## Laser Frequencies for Healing - Frequency Medicine

Frequency is the term used to explain the vibration of energy in all things. Everything we know and understand has a vibrational frequency measured in Hertz (Hz). Royal Rife, Paul Nogier and Jack Swartz were the original pioneers of frequency medicine. They dedicated their lives to discovering the frequencies that correspond to such things as: various diseases, bacteria, viruses and other disorders.

In diagnostic medicine, frequencies are well known: EKG's for the heart, EEG's for the brain, and MRI's for injured cells. The [Scalar Wave Laser](#) is capable of utilizing and emitting hundreds of [specialized frequencies](#) (from 1-40,000 Hz) that are shown below as well as specific well documented healing wavelengths in the red and infrared spectrum including the unique and rare Scalar wave. The patent pending technology known as Scalar Wave Enhancement is the greatest breakthrough in Low Level Lasers. It makes it possible for the laser to erase old cellular memory that is inhibiting the healing process and boost the immune system utilizing the waves with multiple wavelengths from 405-780 nm. With the Scalar Wave Laser you can choose from hundreds of frequencies or thousands of frequency combinations including the [157 Custom Frequency Settings](#) shown below.

Frequency is measured in Hertz (Hz) and a Lasers light wavelength is measured in nanometers (nm). Low Level Laser Therapy is the application of specific wavelengths of coherent laser light, however some unique lasers such as the Scalar Wave Laser also deliver specific hertz frequencies for added benefit and increased results. Select laser light wavelengths supply the tissues at a cellular level with photons and electrons. Wavelength and color are basically the same in the visible spectrum. Laser Light in the wavelength range around 405 nm produces a violet light, wavelenths of 600 - 700 nanometers (nm) results in visible red light, which penetrates up to 1/2". In the wavelength range of 701 - 1000 nm, invisible infrared laser light results, with a penetration depth of 2-3". These specific wavelength groups of coherent laser light are the most commonly used for cold laser therapy and healing of countless conditions. They quickly help to activate the bodies' inate cellular communication system and support positive immune, enzyme and endorphin responses. The most preferable red light wavelengths are 630-660 nm, and the most preferable infrared are 780-905 nm.

**Understanding Frequencies:** Royal Rife is considered to be the father of frequency medicine. He described frequency in diseased and healthy organs and established many frequencies for various diseases and disorders. Since his famous work in the 1930's and 1940's many other studies have been done on frequencies by various researchers, including the Federal Government.

Provided below is a compilation of the frequencies determined by multiple studies done to date, for various disorders, by various researchers including Royal Rife, Paul Nogier and Jack Swartz. Jack Swartz, author of "Human Energy Systems" and other books is another referenced expert in frequency medicine.

**Neither this author nor the factory can ascertain that the following frequencies accumulated from various sources are valid nor accurate. The user accepts full responsibility for any frequency programming. No medical claims are intended or implied.** Any one or all of these frequencies can be programmed into the [Scalar Wave Laser](#).
